## **SUMMER/EARLY FALL NEWSLETTER**

The "Dog days of Summer" are finally coming to an end.

Did you know that "dog days" comes from Roman and Greek astronomical observations? Roughly from July 3 to August 11, the Dog Star (Sirius) in the Canis Major constellation is visible in the Northern Hemisphere. Hence, dog days!

After the seventh consecutive week of heat to your weakened cool-season lawns, the stress levels on the lawns show a widespread crabgrass infestation and summer brown patches. We have been actively applying pest control to control these problems.

The Good News: As the weather cools, in a couple of weeks, we will be there in September to renovate your lawns with Re-Seeding, Vertical Slicing & Dethatching, and apply Lime.

All of this care along with the cooler weather will rejuvenate your lawns.

## **SPECIAL FALL SALE**
